

DEBUGGING SERVICES

Eavesdropping Detection &
Counterespionage Consulting Services

Detection - A key element in every corporate defense plan.

Snoops - internal and external - collect intelligence quietly before they use it. They size up their targets; evaluate the probability-of-success; then steal information to fuel their goals.

Eavesdropping is a key component of pre-attack intelligence gathering.

The good news...

Eavesdropping is an early-warning sign which can be prevented.

Detect eavesdropping and attacks can be thwarted - before the damage is done. Proactive eavesdropping prevention is cheap insurance. Quarterly inspections of sensitive office areas, vehicles and executive home offices are now a common business practice.

Inspections - Easy to add to your corporate defense plan.

A Tech eavesdropping prevention and counterespionage consulting services are provided by our adjunct technical consulting firm - **Murray Associates**. Their excellent reputation for investigative success and absolute confidentiality spans 25+ years.

Please contact them now. Trust them for pro-active protection and to solve your current concerns.
